Introduction

The EZ-Fit® Filtration Unit is a disposable filtration device for bioburden testing of liquid samples like water, process samples, or final products. It is designed for optimizing and securing the laboratory workflow to provide time-saving and reliable microbiological results. After the filtration of the sample, the membrane can be transferred and cultured on an agar plate. Alternately, on the blue unit only, liquid media can be added after the filtration, and the device converts into a Petri dish.

This disposable device is designed to fit onto the EZ-Fit® Manifold, which features specific EZ-Fit® Filtration heads. It can also fit onto a standard #8 stopper.

The EZ-Fit® filtration device consists of:
