Millex® (33 mm) Sterile Syringe Filter

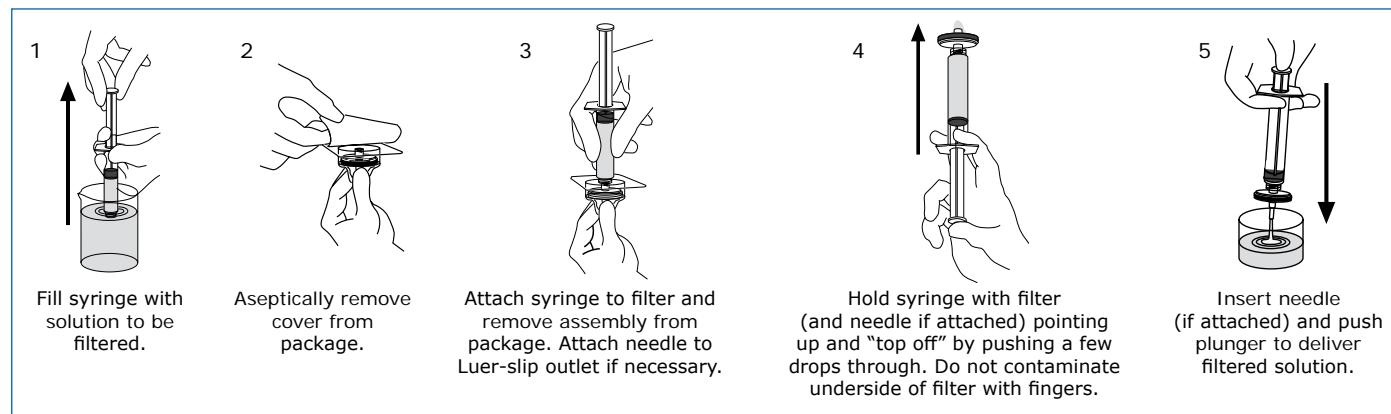

Introduction

This document provides compatibility information, operating steps, and specifications for the Durapore® hydrophilic PVDF family of sterile Millex® filters. The Millex® filter's bidirectional support of the filter membrane enables users to filter aqueous solutions in either direction; forward (from the syringe into the container) or backward (from the container into the syringe). The Millex® filter removes microorganisms, particles, precipitates, and undissolved powders larger than the membrane's rated pore size. These single-use filters consist of a membrane filter sealed in an acrylic housing. They are non-pyrogenic and non-toxic.

Applications

For research use only. Typical research laboratory applications include the sterile filtration (VV/GV) and/or clarification (VV/GV/HV) of protein solutions, tissue culture media, additives, buffers, and water.

How to Use the Millex® Sterile Filter

WARNINGS:

- To ensure sterility, do not use this product if the package is damaged.
- Do not use this product as an in-line filter for intravenous fluid administration; it was not designed for long-term continuous use.

CAUTIONS:

- Do not use the Millex® filter to filter fluids at temperatures above 45 °C (113 °F).
- Do not use the Millex® filter to filter emulsions or suspensions because it was not designed for that purpose.
- Do not use the Millex® filter to filter solutions containing 5 milligrams (mg) or less of materials unless binding studies have been performed.
- Do not use the same Millex® filter to filter solutions in both directions.
- Do not re-sterilize or reuse the Millex® filter, as we cannot assure the sterility, integrity, and performance beyond a single use.

Chemical Compatibility

The Millex® filter with Durapore® membrane is compatible with most aqueous solutions. Based on information from technical publications, materials suppliers, and laboratory tests, we believe that the agents listed in the following chart are safe to use with Millex® filters. However, because of the effects of variability in temperature, concentrations, duration of exposure, and other factors outside of our control, we do not provide or imply a warranty with respect to this information.
